Wordpress	Beginner	<div><div></div><div></div><div></div><div></div><div></div></div>	Experienced

Shown above is a selection of tools I have worked with during design processes.

EXPERIENCE

DH Solutions – Internship 2023-2024

At DH Solutions, I became a key player in several different projects where I was able to contribute my knowledge and perspectives on accessibility, UX/UI design, and coding.

Snabbgross – Seasonal job 2022 - 2024

At Snabbgross, I worked as a store assistant, helping out wherever needed. For example, with e-commerce picking, checkout, or unpacking. The job involved a lot of customer interaction and collaboration with colleagues.

Stadium Outlet – Temporary post 2019

The job as a retail salesperson involved a fast pace and multitasking. Varied tasks included working the register, pricing, placing security tags, and customer interaction. There was close collaboration among colleagues.

Halmstad Kommun – Monthly employment 2017 - 2018

The job as an additional resource was educational. I had the privilege of working with children of various ages, from 1 to 6 years old. It helped me grow as a person, as I learned a lot about different children, each with their own personality. No day was the same, and problem-solving was part of the daily routine.

Hemmakväll – Hourly employment 2015 - 2016

At Hemmakväll, I learned how things work in a store—everything from opening, closing, cash handling, fronting, unpacking, displaying, and restocking various items, among other tasks. I really enjoyed being able to help people; that was the highlight!

EDUCATION

Accessibility, EAA. EC Utbildning Göteborg 2024

This education deepens my understanding of digital accessibility, where I learn how to make digital interfaces accessible to people with different needs. This is in accordance with the European Accessibility Act (EAA) and Web Content Accessibility Guidelines (WCAG).

Front End Developer. Medieinstitutet Göteborg 2022-2024

This education provided the fundamentals of front-end development, such as HTML, CSS, and JavaScript. It combined theoretical and practical learning.

Social Sustainability. Halmstad University 2022

Individual course in Social Sustainability. Introduction to the three dimensions of sustainable development: ecological, economic, and social sustainability.

Digital Design and Innovation. Halmstad University 2019-2022

180 ECTS credits bachelor's program with an introduction to the work of a digital designer. The program has combined both theoretical and practical work.

Sale & Customer Service. Astar Halmstad 2014-2015

This education focused on teaching sales techniques and customer service. I chose to specialize in retail due to my interest in working in a store.

Theater. Sturegymnasiet Halmstad 2010-2013

An incredible journey for me personally, as standing on stage allowed me to get to know myself better and constantly challenge myself. I will carry this time with me for the rest of my life as a valuable period during which I developed as a person.
